An acute, encephalitic viral infection. In humans, it is almost invariably fatal. Human beings are infected from the bite of a rabid animal, usually a dog. *See also:* [Animal virus](#)

Infectious agent

The virus is bullet-shaped with a cylinder diameter of about 10 nanometers and a length of about 210 nm. The nucleic acid is ribonucleic acid (RNA). The virion is enveloped, covered with projections, and ether-sensitive. A grouping of rabies virus, together with vesicular stomatitis virus of cattle and certain viruses of
